

TECHNICAL DATA SHEET

Urban – easy-does-it – Fast Curing Primer

DESCRIPTION

Urban – easy-does-it – Fast Curing Primer is a rubberised solvent-based primer formulated to promote excellent adhesion between substrate and waterproofing membranes.

USES

Applied directly onto “green” concrete, masonry, wood or damp substrates onto which a damp proof self-adhesive membrane is subsequently applied. Prepares the substrate to ensure strong bond development between the substrate and membrane.

PHYSICAL & CHEMICAL PROPERTIES

Physical State	Liquid
Colour	Black
Flash Point	>24 °C
Solubility	Insoluble in water
Specific Gravity	~0.90 g/cm ³
VOC	<750 g/L

APPLICATION

All surfaces should be free from any contaminants (dust, dirt, grease, oil etc.) before application. Application at temperatures below 0°C is not recommended. Apply by brush or roller at a coverage rate of 10m² per litre. The product should be dry to the touch in approximately 30 minutes. Allow for more drying time in colder conditions. For best performance, the membrane should be applied shortly after the primer is fully dried to avoid a build-up of contaminants on a newly primed surface.

PACK SIZES

Typical: 25L. Contact Urban Hygiene for non-standard pack inquiries.

STORAGE

The product must be stored in a dry, cool, well-ventilated space in its original container. Containers must be kept tightly closed.

HEALTH & SAFETY

Please refer to the SDS and product label prior to use. Use under well-ventilated conditions. Do not breathe or inhale product vapour. Avoid skin and eye contact.
