

## Data Sheet: Waterproofer + Fungicide

### Description

An aqueous polymer, which impregnates porous surfaces and imparts a transparent barrier against oil and water, and also provides stain resistance and release characteristics. It does not alter the appearance of the substrate or its vapour permeability.

Waterproofer + Fungicide is suitable for sealing natural stone, concrete, marble, terracotta; paving stones, granite, clay, slate and unglazed tile, and may be applied to both vertical and horizontal surfaces.

The incorporation of a non-hazardous broad spectrum biocide makes the product effective against moss, algae, bacteria and fungi.

### Advantages

- Outstanding resistance to water.
- Oil, grease and dirt repellent.
- Resistant to ageing and weathering.
- Suitable for concrete, paving stones, terracotta, marble, granite, clay, slate and unglazed tile.
- Release characteristics allow easy removal of chewing gum.
- Abrasion resistant.
- Fast drying, single pack.
- Non-toxic.
- Prevents moss and algae growth

### How to use

Wash the surface to remove contaminants and allow to dry.

Apply Waterproofer + Fungicide by brush, roller or low pressure spray at a nominal rate of 5m<sup>2</sup>/litre and allow to dry. A second coat may be necessary for particularly absorbent surfaces. This may be applied after the first coat has dried for a minimum of 2 hours. Allow to dry for 24 hours before service.

### Pack Size

5 Litres, 25 Litres.

### Storage and Shelf Life

Store in dry conditions between 10°C and 25°C.

If unavoidably exposed to very low temperatures, allow to warm up to room temperature and stir prior to use.

Waterproofer + Fungicide has a minimum shelf life of 2 years when stored under normal conditions.

### Limitations

Do not apply externally if rain is anticipated during drying time.

### Health and Safety

Not a hazardous substance according to current legislation.

Refer to separate health and safety data sheet prior to use.
