

## Urban “easy-does-it” Odour Eliminator

### Description

Urban “easy-does-it” Odour Eliminator is a microbiological active formulation designed to clean and deodorise. The product has been designed for usage on hard surfaces and also for carpets cleaning where it has been shown to have a highly effective deodorising action. Urban “easy-does-it” Odour Eliminator does not mask odours but breaks down the organic matter that is causing the odour.

### Features:

- Biologically active
- Non-hazardous
- Multi-functional

### Benefits:

- Destroys the cause of the malodours
- User safety
- Only one product required for numerous application

### Directions for use:

**General Cleaning** – Dilute to 20% for cleaning floors, showers, sinks, urinals, tiled surfaces etc.

**Odour Control** – Dilute to 50% and spray onto hard surfaces

**Carpets/Upholstery** – Remove as much of the debris as possible and spray neat

Urban “easy-does-it” Odour Eliminator onto substrate and then sponge the surface with hand hot water. For particular bad odours (milk, vomit, urine), spray neat Urban “easy-does-it” Odour Eliminator onto the contamination and cover the surface with a damp cloth and leave for several hours and then vacuum dry.

**Carpet Machines** – Apply to 10% and use as a standard carpet shampoo

**Pipe/Drain Cleaning** – Apply directly to drains and leave for 12 hours, repeating this procedure as required.

**Refuse Containers** – Spray directly to cover all surfaces of the refuse container. Repeat this procedure weekly to eliminate odours.

## Physical characteristics:

|                    |                     |
|--------------------|---------------------|
| Appearance         | White liquid        |
| Odour              | Miscible with water |
| pH of use solution | 7 - 8               |
