

Urban “easy-does-it” Driveway Oil and Stain Remover

Description

Urban “easy-does-it” Driveway Oil and Stain Remover is a blend of non-caustic alkalis, coupling agents and non-ionic detergents in water. The product has been developed as a solvent free emulsifier and dispersant for oil and grease.

Urban “easy-does-it” Driveway Oil and Stain Remover contains no hydrocarbon solvents and therefore is non-flammable, biodegradable and safe for use on tarmac and asphalt surfaces. It is widely used for cleaning away oil spillages and greasy deposits and is particularly useful in areas where there is a risk of fire, contamination, corrosion or pollution from solvent-based products.

Urban “easy-does-it” Odour Eliminator is suitable for use on most metal, plastic, painted surfaces, concrete, tarmac and asphalt but care should be taken with Aluminium, Zinc and their alloys as concentrated solutions may damage these materials.

Features:

Contains no hydrocarbon solvents
Non-flammable
Biodegradable detergents

Benefits:

Safe on tarmac and asphalt
Reduces fire hazard
Minimises environmental impact

Directions for use:

Use as supplied or diluted with up to 5 volumes of water for lighter duty applications. Apply by low pressure spray direct on to the oil spillage or deposits. Oil, grease and tar deposits will require 10 – 20 minutes soak time, stubborn deposits may require longer or manual agitation to assist removal. Rinse thoroughly with clean water.

Physical characteristics:

Appearance	Colourless viscous liquid
Odour	Faint detergent
Specific gravity	1.05
pH of concentrate	12.0
Detergent type	Non-ionic biodegradable
Corrosive action	Concentrated solutions may corrode Aluminium, Zinc and their alloys
Flammability	Non flammable
Use concentration	Generally used as supplied but can be diluted with water
