

## Non Stick Paint

### Description

Flygo Clear Anti-Fly poster Paint prevents adhesives such as glue, wallpaper paste, and even Superglue from adhering to walls protected by its non-stick finish. Unsolicited advertising posters will not adhere and the increasingly common "Sticker-Bomb" Graffiti attack is rendered ineffective as Sticker Based Graffiti Tags blow away. Flygo Anti-Fly poster Paint protects Street Furniture, Roller Shutters, Lampposts and any other external surface that may be attacked and is a "True Permanent" solution to the Fly poster problem with a single application of this Adhesive Resistant Coating lasting more than 20 years without the need for reapplication.

### Advantages

- Clear finish anti-fly poster coating.
- Can be applied to any substrate
- Permanent system lasts for 20 years
- Simple to apply single pack paint
- Durable, effective, sticker protection
- Protection from fly posting & graffiti
- Matt finish and long-lasting resistance
- Repels fly posters and sticker-bombs
- Ideal for street furniture and cabinets
- Posters fall off or are easily peeled
- No water or solvent cleaning needed
- Permanent finish. No need to reapply
- Clear. Maintains natural appearances
- Resists sticker-bomb graffiti attacks

**Application:** Apply by brush, roller, convention or airless spray.

**Coverage Rate:** 8 to 10 square metres/litre depending on surface porosity

**Drying Time:** Touch dry 3/4 hours; full cure 24 hours.

**Surface Preparation:** All surfaces must be clean and dry, remove any soiling by power wash etc. Any soiling/graffiti apparent on painted surfaces i.e. masonry / rendered walls should be re-painted with good quality masonry exterior paint, prior to application.

*nb. Non-Darkening Primer should be applied prior to top coat on all sandstone/brick surfaces.*

**Flash Point:** Above 64 deg C

**V.O.C:** 50g per litre
